DETAILED ACTION

The present application was subjected to a restriction requirement and a restriction (Paper No. 4) has been mailed to applicant on 4/26/2002.

In response to the restriction requirement, applicant has canceled all of the claims as originally filed, and then added a new set of claims, i.e., claims 21-45, into the present application.

As a result of newly-added, the pending claims 21-45 are now subjected to the following restriction.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-40, drawn to a board band ultraviolet achromatic catadioptric inspection system having an objective lens for imaging a first object subjected to a first ultraviolet wavelength and for imaging a second object subjected to a second ultraviolet wavelength different from the first ultraviolet wavelength , classified in class 359, subclass 351.
 - II. Claims 41-45, drawn to an inspection system having an illumination system configured to scan a surface of an object with different ultraviolet wavelengths and an objective lens for forming multiple images of the surface of the object at different focal planes, classified in class 359, subclass 205.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention II has separate utility for use in a bar code scanner for reading a bar code without the details of the lens structure as recited in the invention I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Ann M. Mewherter on 7/19/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q. Nguyen whose telephone number is (703) 308-4814. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cassandra Spyrou can be reached on (703) 308-1687. The fax phone
